

In the Claims.

Please amend claim 14, as follows:

Version with markings to show the changes made:

14. (Amended) A modular cage, comprising:
corner joints having a corner body and at least three tangs that protrude at right angles
from said corner body;
reversible locking devices provided at said tangs;
first profiled elements, comprising first seats which have surfaces thereof shaped
complementary to the tangs, said tangs being insertable with said reversible locking
devices in said first seats for interlocking ;
second profiled elements comprising first seats which have surfaces thereof shaped
complementary to the tangs, said tangs being insertable with said reversible locking
devices in said first seats for interlocking; and
grill-like wall elements;
additional supporting seats provided both at said first and second profiled elements;
said grill-like wall elements being removably accommodated and retained in said
additional supporting seats and said first and second [profiles] profiled elements being
removably connected to each other and interlocked by way of said corner joints so as to
form a supporting frame [and] on which said grill-like wall elements [being] are
removably [connected to said supporting frame] supported so as to form said cage.
